

# AO Home

Can easily be retrofitted into your existing home plumbing system; allowing your family to realise the full benefits while drinking, showering and gardening.

# AO Bed

Offers a unique opportunity to relieve stress, calm one's senses, and align the mind, body and soul.

# AO Hydro

Water plays a crucial role in the farming and manufacturing process. By utilising the benefits of AO Hydro, the processes can be more efficient.

ALPHA  
OMEGA  
WATER

DRINKING WATER ACTIVATION  
HYDRO MAGNETIC THERAPY BEDS  
WATER EXTENSIVE INDUSTRIES

## At Alpha Omega Water Technologies

our cutting edge devices are designed to stimulate activity in water to fully utilise its beneficial properties.

Our devices use both high gradient and super-conducting magnets and a variety of other proprietary components; which when optimised, create highly effective devices **applied in homes, spas, clinics, manufacturing and farming industries.**

## Various independent published studies

have shown that magnetic fields under certain conditions can have a beneficial effect on water activity.

### For the Body:

Benefits include enhanced enzyme production and oxygen uptake rates.

### Technical Processes:

Magnetic fields can also be used to remove colour, heavy metals, and toxic chemicals.

## Alpha Omega Water Technologies

has spent the last 15 years through research and development optimizing our devices to **achieve the highest benefits possible.**

Due to these benefits, we reference the water run through our device as «ACTIVATED WATER»

*"We are currently using the Alpha Omega device in our home for drinking and showering. Now that we have experienced the change in the water, we could never go back to using normal tap water again!"*

- Jill, Germany

## Main components of our technology:

- **Natural activator** built into the device which acts as a catalyst
- **The geometry of the probe** to enhance the effect of the elements contained in the device
- **High gradient and super-conducting magnets.** All components are highly proprietary information.
